TROPICAL JOURNEYS LAUNCHES NEW OUTER REEF VESSEL

Tropical Journeys are excited to announce the arrival of a new outer reef vessel to the Calypso Reef Cruises fleet in July this year.

Calypso Reef Cruises' newest vessel, yet to be named, will be slightly smaller than our largest vessel, Calypso Snorkel & Dive and will accommodate both snorkelers and divers with the option of being a dedicated snorkelling vessel if necessary.

Calypso is known for regularly updating their outer reef vessels and now operates with the newest vessels with the most up-to-date technology available in fuel efficiency and navigational equipment. This vessel will be fitted with comfortable day-bed style seating throughout and will boast a spacious back deck and submerged platform for easy access into the water, the same as her sisters.

With the expected arrival date sometime in July 2013, we'll be looking forward to taking more visitors to explore Opal Reef on the Outer Great Barrier Reef from Port Douglas.
